ANCHOR BOARDWALKS

ANCHOR BOARDWALKS

SMARTER FRP BOARDWALK SYSTEMS, BUILT FROM EXPERIENCE

Anchor Products is an Australian-owned and operated company born from the hands on expertise of the Carter Marine Group team—renowned for delivering complex marine and inland boardwalk infrastructure across Australia.

With decades of experience on the frontlines—installing piles, inland boardwalk/walkway structures, and heavy-duty marine systems—we know what works, what doesn't, and what truly delivers value in the field. That deep rooted understanding of real-world construction challenges has driven us to develop FRP boardwalk systems and associated products that meet the demands of today's contractors, project managers, councils and the high expectations of the end user.

Our end-to-end design service includes detailed FEA modelling and engineering support, with reliable delivery and installation in even the most remote locations and sensitive environments like the Bemm River Pathway, The Krauatungalung Walk in Lakes Entrance, and the Coomee Nulunga Cultural Trail in Ulladulla. Thanks to our strong partnership with Surefoot, and piling experience, we offer rapid and secure piling solutions tailored for environmental and cultural sites.

Why choose FRP from Anchor Products? Our systems, and product range from structural sections to mesh, are lightweight for easy handling, non-conductive for safety, non-corrosive for longevity, and customisable to meet your project's unique needs. Whether you're focused on environmental preservation, coastal boardwalks, or retaining walls, our products are engineered with real-world conditions. ***We've built it ourselves, so we know exactly what you need - and what works.***
