

ANCHOR

PRODUCTS

At Anchor Products, we take pride in delivering comprehensive, end-to-end Fibre Reinforced Polymer (FRP) project solutions—from the first sketch to long-term support. Our integrated approach to project design and construction ensures every detail is thoughtfully planned, expertly executed, and aligned with our clients' goals. We collaborate closely with stakeholders during the design phase to tailor robust, high-performance anchoring solutions that meet site-specific requirements. During construction, our team ensures precision installation and quality control, minimising disruption while maximising durability. But our commitment doesn't end there. Through dedicated aftercare services—including performance monitoring, maintenance guidance, and responsive support—we ensure the continued success of every installation. At Anchor Products, we don't just build solutions; we build lasting partnerships.

RESEARCH & CONSULT

We collaborate with clients across sectors—civil, marine, transport, rail, government, energy and environment to understand site context and performance requirements, leveraging our FRP specialists and engineering support

DESIGN

Our technical team provides tailored engineering design of FRP structures—boardwalks, access platforms, gratings—ensuring compliance with Australian standards

ORDER

We offer flexible supply options—from stock lengths to pre-assembled components. For larger tenders and jobs we can also supply a sliding scale price sheet for you to work on alongside the team to get the best quote prepared possible.

INSTALL

Our experienced FRP install partners and contractor partners ensure efficient, high-standard installation services. Alternatively our team can consult with you and help your team install.

FOLLOW UP

Through ongoing collaboration from initial tender to aftercare, we support commissioning, provide maintenance advice, and offer long-term support—creating case studies to support your business and next tender
